

REMARKS

Claims 49-85 are pending in the present application.

Claims 49-85 are allowed in the office action.

Specification

The disclosure is objected to because of the following informalities: In page 7, lines 33-35, “If both software programs are authenticated, then processor 102 generally will reject the available software and it will not be loaded into computing device 100” appears incorrect according to the fig. 2 of the drawings. If both software programs are authenticated, the processor will load the available software in the computing device based on the flow in the figure 2.

Applicant respectfully requests that the objection to the disclosure be withdrawn for the following reasons. The description on page 7, lines 33-35, of the specification as noted above describes another embodiment (“another embodiment”) different from an embodiment shown in Fig. 2 of the drawings. As described on page 7, line 26 – page 8, line 3 of the specification, this another embodiment is a variation of an embodiment described on page 7, lines 7-25. On page 7, lines 33-35, as noted above, the “both software programs” refer to, in one aspect, a previous version of the available software and software unrelated to the available software (see page 7, lines 26-28). Hence, it is respectfully submitted that the description on page 7, lines 33-35, as noted above, is correct and furthermore, this description is not describing Fig. 2. For the above reasons, Applicant respectfully requests that the objection to the disclosure be withdrawn.

REQUEST FOR ALLOWANCE

In view of the foregoing, Applicant submits that all pending claims in the application are patentable. Accordingly, reconsideration and allowance of this application are earnestly solicited. Should any issues remain unresolved, the Examiner is encouraged to telephone the undersigned at the number provided below.

Respectfully submitted,

Dated: **January 27, 2011**
